USSD APIs Documentation

A documentation on which APIs will be used and how they are implemented

- Introduction
- How to use USSD codes for payments
- Equipment Reconnection
- Equipment Reregistration
- Fee Payment
- Task-force checks
- Benefits of using USSD codes for payments
- USSD guide

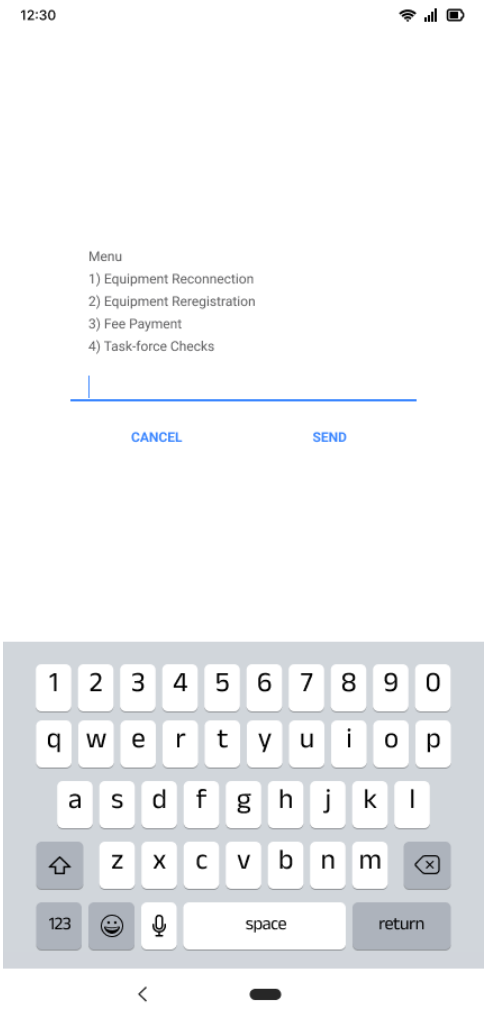
Introduction

There are several payment methods available for clients to pay for services and goods purchased at the Ghana Mine Repository Tracking and Control Room. One can make payment by using USSD codes. USSD stands for Unstructured Supplementary Service Data, it is a protocol used by mobile network operators to allow users to interact with various services through short codes. USSD codes are usually entered into your phone’s dial pad, and they enable you to perform certain tasks or access specific services.

How to use USSD codes for payments

To access the payments options is so easy. All you have to do is;

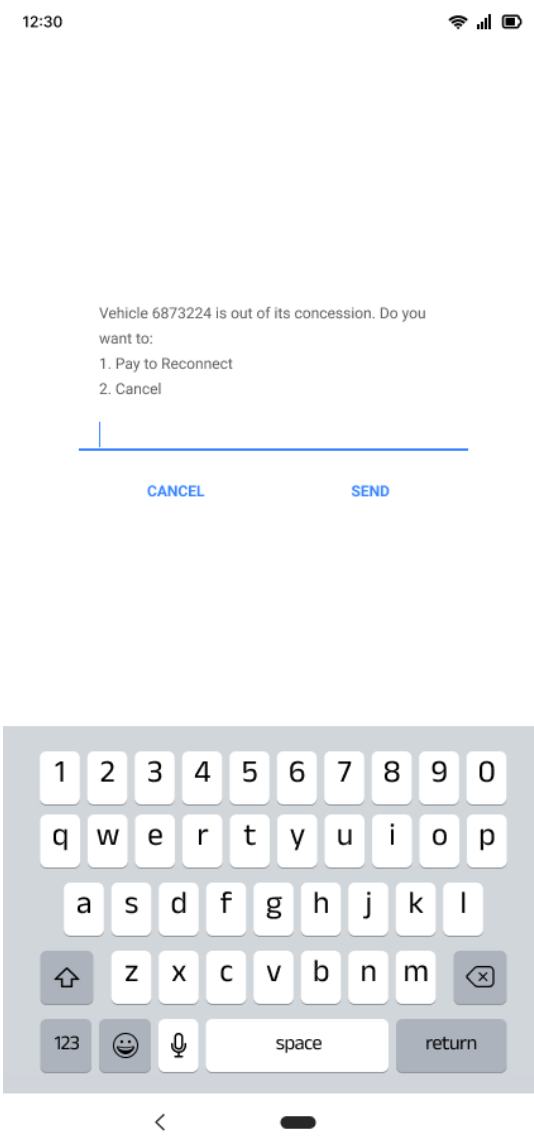
- Dial the USSD code (e.g. *909#)
- Follow the on-screen prompts to select the payment option you want.



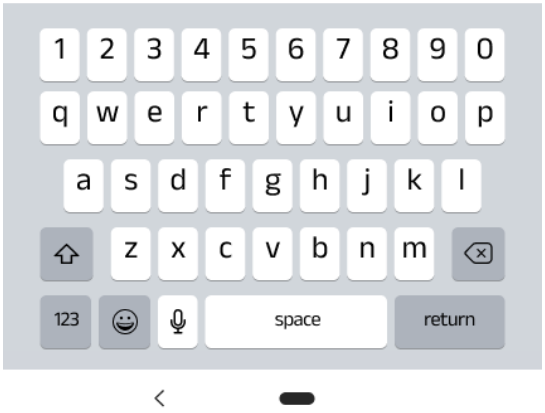
Equipment Reconnection

For equipment reconnection;

- Enter your chassis number and press send
- A prompt confirming your chassis number and reason for the payment is sent
- You either press 1 to reconnect or 2 to cancel and then send.



- After selecting 1 and sending you will receive a prompt to proceed with payment.
- You will then receive a prompt requiring you to enter you MM pin.



- After entering and sending your MM pin, you will then approve your transaction.
- You will receive a prompt stating that your payment has been made successfully.

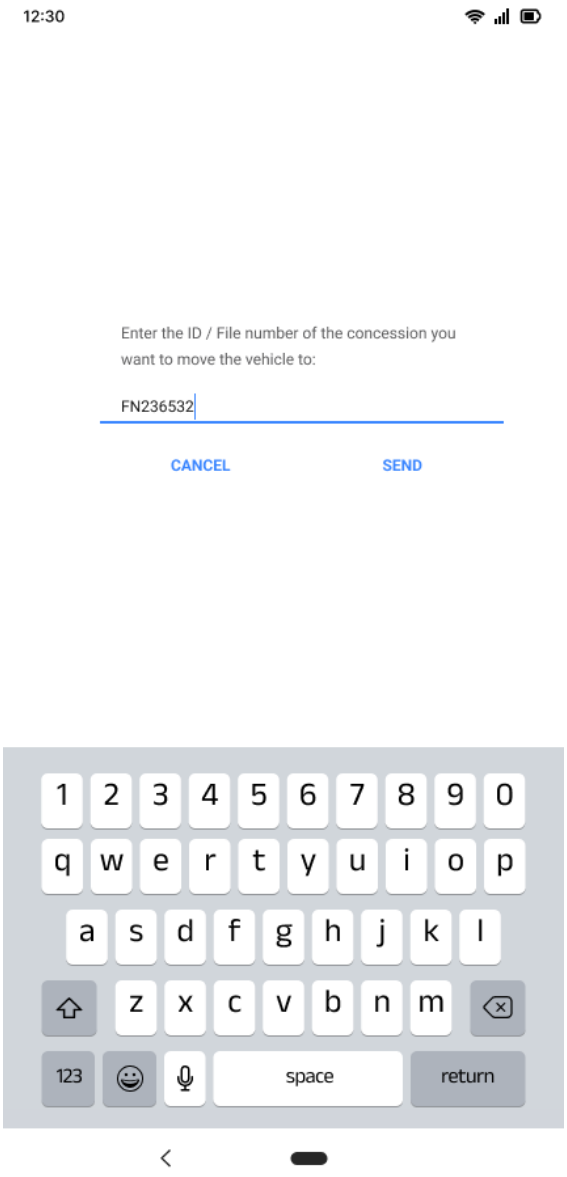
Payment of 50.00 has been made successfully.
Current Balance: GHS 98,054, Available Balance
GHS 98,104

OK

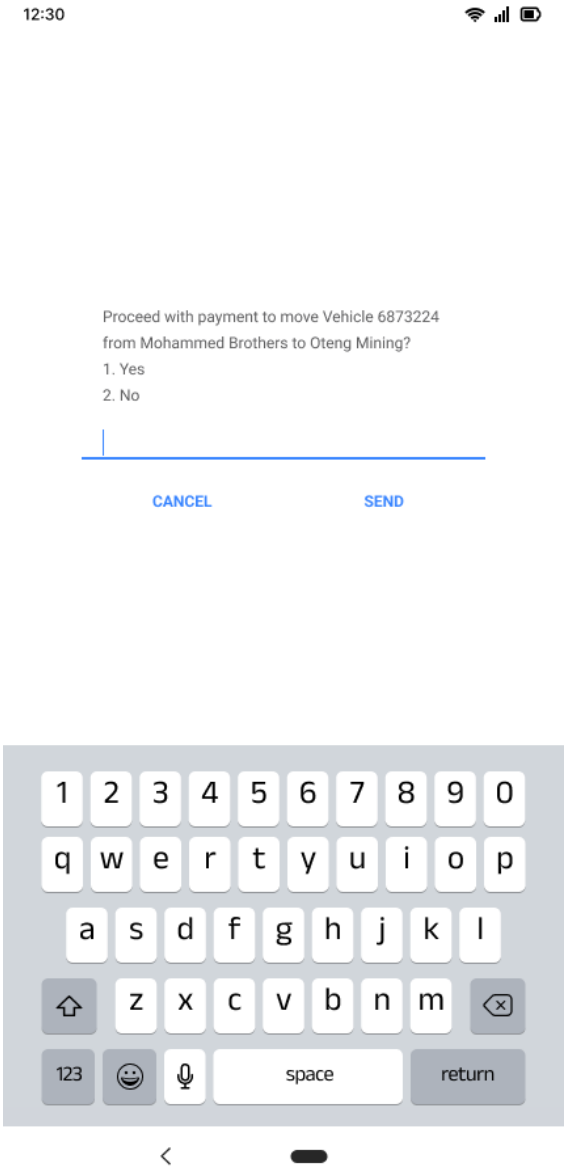
Equipment Reregistration

For equipment reregistration;

- Enter your chassis number and press send.
- A prompt confirming your chassis number and enquiring if you want to move out of your concession is sent.
- You receive a prompt asking you to enter the file number of the concession you are moving your vehicle to.



- You are then asked to confirm the file number.
- You would be asked to proceed with payments.



- You will then receive a prompt requiring you to enter your MM pin.
- You will then approve your transaction.
- A prompt stating that your payment has been made successfully will be sent.

Payment of 50.00 has been made successfully.
Current Balance: GHS 98,054, Available Balance
GHS 98,104

OK

Fee Payment
